

Fiber Optic Patch Panel Datasheet

» Description

Fiber Optic Termination Box/Patch Panel (OTB) is mainly used as terminal equipment of fiber optical cable for optical fiber wiring, fixation, fusion and patching.

The Rack-mount fiber optic distribution frame is a modulated design with drawable trays inside and cold-rolled steel box. It could be pre-installed with various kinds of fiber optic adapters and pigtails.

It is with standard 19-inch size and properly designed to control the bend radius of the cable inside the enclosure to avoid extra optical loss. Its front mark on the plates is easy for identification and operation.
